All free puzzles, bubbles, or classic Angry Birds friends are playable in high quality toon. Pop & Smash Epic Toy Bubbles with Classic Toy Designs.Angry Birds Dream Blast Free Puzzles come with epic toy features in 2020:Angry Birds Dream Blast, one of the best games Free bird bubble shooting 2020 is available with classic bird looks. All free puzzles, bubbles, or classic Angry Birds friends are playable in high quality toon. Pop & you'll start creating birds (as rare as that sounds). The first bird you'll make is Red, and from here you can make combos. – Red: This will destroy the bubbles online, to your left and right. – Chuck (Yellow Bird): This will destroy all the bubbles around you in a cross formation (on the top, bottom, left and right lines of it). It is formed by combining 2x Red. – Bomb (Black Bird): This will destroy all the bubbles around you in an explosion. It's formed by combining 2x Chuck. What to keep in mind here is that the effects of these bird boosters increase if more bubbles have burst. For example, if you were to pop 8 bubbles at once, you would have a huge red impulse that could destroy everything from side to side. If you had only 4 bubbles paired in red, then when you use Red, it would only destroy about half the screen. So that's one thing to keep in mind about these impulses: always try to blow as many as possible at once. Also, when you combine the birds (or rather combine) if you have a huge red combining with a small one, the resulting Chuck will be of medium size. So it's good to always try to move them so that combinations are made only with larger birds. Completing the Each level will require you to do something a little crazy to pass it on. Those level requirements can be anything from dissipating a nightmare cloud to dropping eggs that won't break. In order to get a better idea about them, here you have them: – Pig bristles: These strange strangers One-sided locks will be unlocked once you've collected all the necessary bubbles from the color that has the lock. – Key locks: These locks will be unlocked once the key reaches the baseline, also known as the lock. – Eggs: Eggs are a goal that some levels might require. Eggs have to reach the bottom of the level, even if the level has locks, you'd better make sure you open them quickly before running out of moves. – Paint jars: The paint jars will break once you touch the bubbles next to it. Once it breaks, it will color some random bubbles with the color in the jar. – Blocks: They come in 3 shapes and shapes. Ice Blocks (which break when it matches the bubbles next to it), Stone Blocks (which break with bird enhancers or power-ups) and Jelly Blocks (which break when you touch bubbles of the same color as the gelatin block, but only if you are near it). – Chained Bubbles: Can only be removed with bird enhancers or with their power-ups. – Nightmare Cloud: This cloud can be removed by matching the bubbles one of the areas that is present (but consider the blocks, because you may need to remove them if they are at the top of it). – Pigs: As in all Angry Birds series, there have to be some pigs. Here, pigs are some bubbles that you will need to pop in order to pass the level (as many as the level requires). Large pigs explode into two smaller ones, and count once per blow. Don't shy away from using some power-ups Power-ups can be a total game change. You get power-ups every time you level up, or you can use the gold coins you can buy some. They can be used to help you finish some more difficult challenges in the levels, or just to have fun (which I don't exactly recommend). – The shooting star: This sends a falling star to explode in the area to which it is sent. – The slingshot: This removes a bubble or tile of your choice. – Tornado Shuffle: This will shuffle all bubbles on the screen (except special ones), so don't do it if you want to put the birds next to the blocks, because they won't move. I suggest that if you are dealing with a more difficult level, then try to use these to help you erase the last remaining tiles. As long as you use a power-up, it won't count as a move, so take that into account. Connect to Facebook If you plan to change your device or simply want to save your progress in case something happens with your phone, I suggest you connect to your Facebook account. By doing this, all the progress you've made in the game will be saved there, so there's no risk of losing all levels. Get more gold coins There are several ways to get them, and even very easy if you decide to put a few dollars into the game, but let's focus on free deals and free ways to get gold coins. One way to get gold coins for free is to level up. Each time you level up, you'll get some coins as well as other goods (such as power-ups and infinite lives for a while). Another way to is by opening the chests that appear after a few levels. The third way to get gold coins for free is by viewing an ad. You'll often have the opportunity to see an ad in exchange for a random item, whether it's life, ignition, or coins. Be unique: change your profile and participate in events You don't have to follow the default name given by the game. I suggest going ahead and pressing to Edit Profile, and then Randomize your name. It will give you some good options, but I suggest you stick to one you like the most. Why is this important? Well, every few hours there's an event, like the Red Challenge and Chuck's Challenge, that will give you rewards based on the results of those challenges. It is better if you reach the top 5, but even the rest of the participants take a prize. Challenges are basically a competition in which players go against each other making the biggest bird augmentation of that specific challenge. The Network Challenge will be the hardest, as Red is the most frequently available. Chuck's Challenge is the easiest one you can win, so definitely play a lot when it's on! Other tips and tricks from Angry Birds: Dream Blast: Always try to make bird boosters, even if you don't use them: they will count towards your score at the end of the level. – by activating a bird reinforcement you have another in your range, you will activate the other one as well and thus minimize the movements you use. – Bird enhancers activate the air, so be careful if you activate two or more at the same time. – Beware of the windmill: it will mix the balls that are in your range, so you can use this to your advantage and try to let it take the balls where you want them to be. – If you have a windmill in the level, you don't always have to run to finish the level. You can wait until it all turns out of their way, and then deal with the bubbles in the formation that left them. Here are all the tips and tricks of Angry Birds: Dream Blast that we have for you right now! If you know other interesting things about the game, leave a comment below and share your tips with everyone! All!
